

WALKER
INDUSTRIAL SYSTEMS

Walker Industrial Blower Fans

Our industrial range of fans and ventilation equipment

Walker Industrial Systems are the industrial fan and blower portfolio of the GJ Walker Group.

Servicing customers Australia-wide, we provide robust ventilation solutions for industrial environments. With the ability to customise products to suit individual project requirements, we manufacture a variety of options for different applications.

With performance and reliability at the forefront of design, our fans and blowers are also backed by an experienced team. Our expertise spans a wide range of commercial, HVAC, and industrial environments, and we provide exceptional service, delivery, and performance to the market that is synonymous with the GJ Walker name.

Pharmaceutical

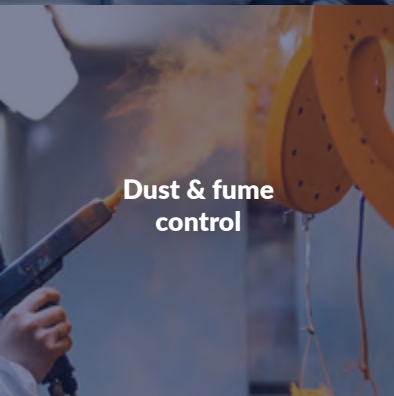

Mining

Paper & Pulp

Manufacturing

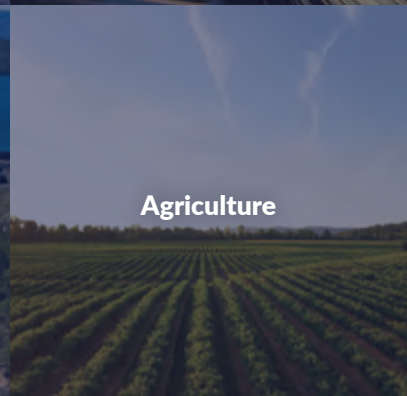

Dust & fume control

Food processing

Water Treatment

Agriculture

DWDI Fans

Walker Industrial Systems double width double inlet fans are made for performance and reliability in a multitude of HVAC installations plus many industrial supply or exhaust systems. They can be manufactured with backward inclined, backward curved or airfoil impellers.

Sizes
350mm to 2400mm

Power range
0.75kw to 300kW

Construction
Galvanised steel, mild steel, stainless steel

Air volumes
exceeding 150,000 l/s

Applications

Car park supply & exhaust

AHU's

Shaft ventilation

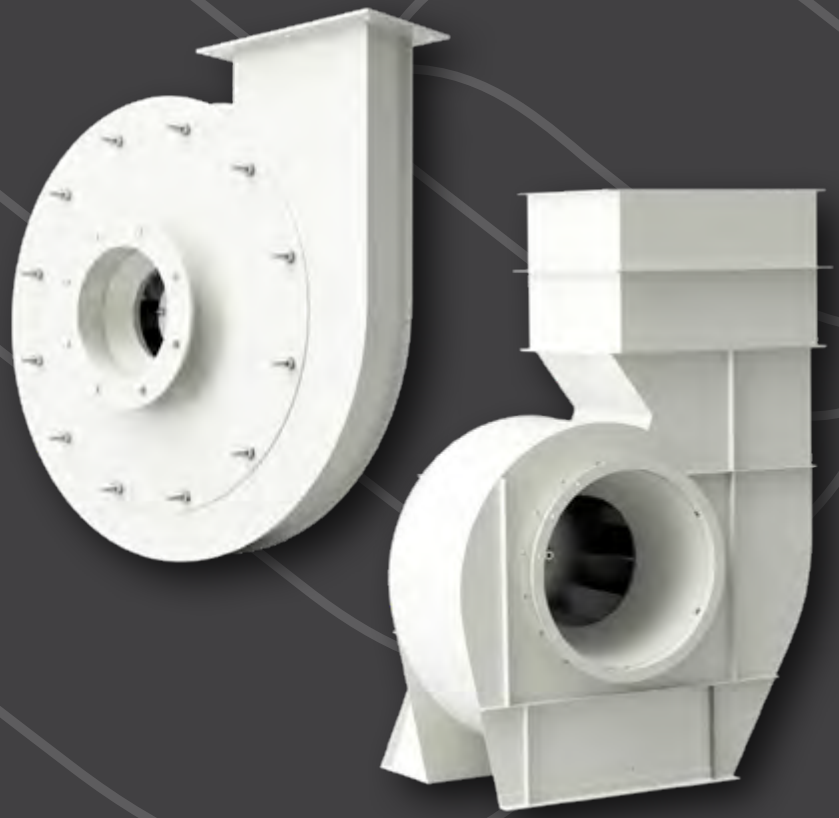

Supply air systems

Mining

SWSI Fans

Single Width Single Inlet fans by Walker Industrial Systems are made for high efficiency, low sound levels and reliability. These high performing fans require low maintenance and can be manufactured with backward inclined, backward curved, radial or airfoil impellers.

Sizes
310mm to 2400mm

Power range
0.75kw to 300kW

Construction
Galvanised steel, mild steel, stainless steel

Pressure
10kPa

Modular solutions
to 37kW

Foot or flange mount

Standard or increased safety solutions

Design temperatures
up to 450°C

Applications

Kitchen exhaust

Toilet exhaust

Dust & Fume

Spray booths

Mining

Agriculture

Ovens & Furnaces

Water Treatment

Industrial Process

Food Production

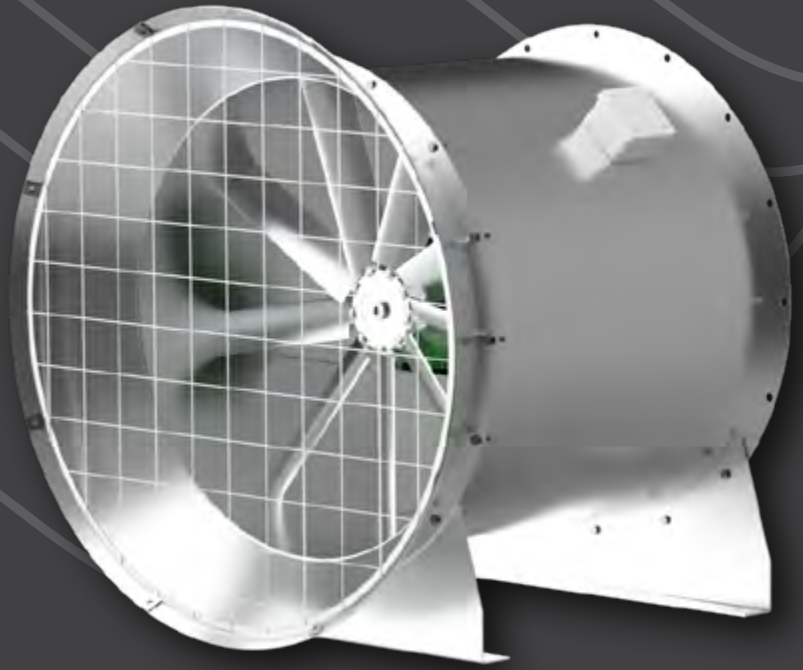

Manufacturing

Paper & Pulp

Axial fans

Made for ventilation, HVAC and industrial applications, Walker Industrial Systems axial fans are recommended for tough environments where customised solutions are necessary to support critical production, processing or air movement requirements.

Sizes
315mm to 1800mm

Power range
0.37kW to 110kW

Construction from
galvanised steel, mild
steel, stainless steel

Air volumes
exceeding 80,000 l/s

Options

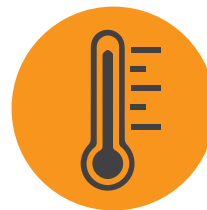

Bifurcated

Belt driven

Silencers
